

The foundations of your future

Prepare for your international undergraduate education!

The International Foundation Year (IFY) at Constructor University prepares students for a successful higher education journey by living and learning on the international campus in Bremen, Germany. This one-year academic preparatory program allows students to explore different fields of study, qualify for an international degree program, strengthen personal and academic skills, and develop English language abilities.

Your International Foundation Year

At Constructor University, we know the importance of personal growth. That's why we have developed an academic preparatory program, the International Foundation Year, that provides students with tailored academic and personal support for their individual development and prepares them for the challenges of university-level study in Germany.

The right pathway for you

Our International Foundation Year offers two pathways to a degree course at Constructor University. You will either have the qualification or orientation pathway based on your high school diploma.

This pathway allows students to study a specific subject area (Technology, Science, Society) in preparation for a degree course.

- Choose one subject (from subject areas Technology, Science, Society)
- 2 Choose 2 modules within the same subject area and study one in the 1st and one in the 2nd semester. Get prepared for the exams necessary for guaranteed admission to your desired degree program at Constructor University
- Take part in the TestAS examination
- 4 Successfully complete the IFY program
- Progress directly onto year one of the chosen degree

Here, students have the opportunity to explore a variety of subjects and decide on their degree program later. Having chosen this pathway they can also stay within one subject area (Technology, Science, Society) throughout the program and prepare for a specific degree course.

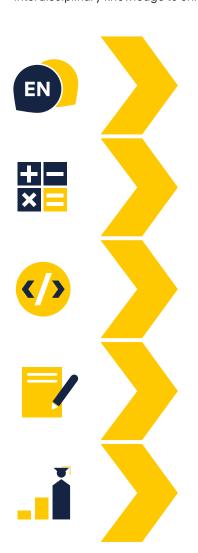

- Choose a subject in the 1st semester
- 2 Have the option to stay within a specific subject area or choose again from a different subject area
- 3 Decide on a degree program in the 2nd semester
- 4 Successfully complete the IFY program
- 5 Progress directly onto year one of the chosen degree

Core modules

The core modules are integral parts of the IFY program. They are designed to provide students with basic interdisciplinary knowledge to enhance their academic and personal skills.

English and Academic Literacy

This module aims to strengthen English language abilities in all four areas (listening, speaking, reading, and writing) and improve academic study skills. Students will also learn the fundamentals of conducting research, such as writing academic papers and citing sources.

Core mathematical skills

Upon joining the program, students will be given a mathematics placement test to determine whether they take the basic or advanced route. Both are designed to help students develop skills in mathematics and statistics. The first semester focuses on generic content, while the module in the second semester is specific to each student's chosen subject.

Coding and Computational Thinking

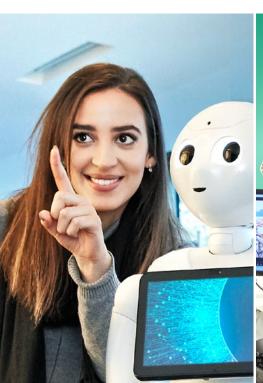

Students will learn the basics of coding and computational thinking, providing them with problem-solving skills that are highly sought after in today's job market.

TestAS preparation

The program also provides students with training for the TestAS, which is the precondition for progressing to an undergraduate degree program at Constructor University. The TestAS only applies to students who must pass a German university entrance examination.

Personal development

This module has been specially designed to enable students to progress to their undergraduate studies. It focuses on increasing the self-competence and social skills necessary to flourish in a university environment. It also provides students with general skills that pave the way for success in life and the world of employment.

Subject areas

Through a combination of core modules and subject-specific study, students will develop the skills they need to start their undergraduate education successfully. Students can choose from three subject areas that are a pathway to a degree at Constructor University.

Technology

This subject area covers the fundamentals of computer programming, coding, mathematics, and technology. Digitalization lies at the core of all modern industries. It plays a major role in today's work life, so these subjects will prepare students to work in modern tech environments.

Science

This subject area prepares students for degree programs within the Life Sciences & Chemistry department at Constructor University. Each program teaches theoretical and practical skills for rewarding careers across many different industries in the field of natural sciences.

Society

This subject area provides students with the necessary foundation to pursue a variety of business or social science careers, from management and accounting to psychology and human resource management. Students gain practical and professional skills that enhance their employability.

Undergraduate transfer options

Students can attend undergraduate-level courses and earn up to 15 ECTS credit points that will count towards their bachelor's degree at Constructor University. This gives students direct experience with course materials and professors before even beginning their studies.

Choose modules from these undergraduate programs:

- Computer Science
- Industrial Engineering & Management
- Chemistry and Biotechnology
- Physics
- Integrated Social and Cognitive Psychology
- Society, Media, and Politics and more

Your benefits at a glance

With the International Foundation Year, students can explore a variety of subjects before choosing a major. Attendees grow academically and personally by experiencing a unique learning and living environment on Germany's most international campus.
