**Prof. Thomas Auf der Heyde, PhD**  
Provost and Managing Director  
of Constructor University

Dear students, dear exhibitors, alumni,

"It is never too late to be what you might have been." – This quote was once said by none other than Mary Ann Evans, or rather George Eliot, as she was commonly known. The famous Victorian era novelist surpassed many barriers to follow her passion, and also be respected as one of the greatest women writers of her time.

Evans' time might have been a different one, but the challenges remain similar: what kind of individual do you want to become? What do you strive to achieve? Within the challenges and perils of today's world, lies opportunity. Opportunity to learn, grow, and make something meaningful out of your career and life. At the Constructor Career Fair, many impulses come together: Curious students searching for their career passion, and employers from a wide variety of sectors searching for unique talent. But finding passion requires exploration, as Evans also experienced, and this exploration takes place at the Career Fair.

The tradition of the Career Fair on our campus has existed for many years. Hundreds of exhibitors have met thousands of students. Thousands of jobs, internships and connections have been secured. Ours is a breeding ground for career success, start-ups and innovation. For students, this is the beginning of a very exciting phase indeed- one where acquired knowledge can finally be applied in the form of a professional start.

Esteemed students, alumni, and employers, I wish you all a fruitful exchange. I would also like to extend my appreciation to our Career Services and Events Team for making this day a success.

Kind regards and best of luck!  
Prof. Thomas Auf der Heyde, PhD

**Eduard Dubbers-Albrecht**  
President of the Bremen Chamber  
of Commerce – IHK for Bremen  
and Bremerhaven

We all are facing great challenges. Multiple crises place politics, the economy and society under a lot of pressure. Nevertheless, we can see a huge structural transformation in Germany. The transition to a climate-friendly, digital and resilient economy strides ahead.

In their transformation efforts, companies can count on an excellent, growing network of science and research facilities here in Bremen. Above all, they benefit from the large pool of well-educated graduates of the universities in the state of Bremen. I am therefore optimistic about the future, and have great confidence that Bremen is strong enough to reinvent itself where necessary.

With its efforts in research and teaching, Constructor University contributes greatly to cope with today's challenges. The "Constructor Career Fair" event provides an excellent platform to bring together companies from various business sectors and well-qualified and motivated young academics. Students have the chance to talk to their potential employers and to find out about entry and career options. And companies have the opportunity to benefit from the transfer of ideas from person to person and to get to know possible candidates.

The event thus builds lasting bridges from science to business. In the light of this, I hope that all the participants at this event will have interesting discussions and will establish new, valuable relationships. Good luck to everybody!

Eduard Dubbers-Albrecht

**Dr. Cornelia Scheitz**  
Alumni Association President

Dear students and fellow alumni,

In today's climate, it has become more apparent that employability is a daunting topic that every student and fresh graduate has to grapple with. With more years of social distancing behind us, there are certainly many hurdles we've overcome. There is, however, even more that we have learned about the job market - lessons that allow us to see the silver lining and moments of opportunity for members of the Constructor community. As the world has been contending with the pandemic, your alma mater has managed to find new ways for you to continue living the university experience.

That is because Constructor is more than a university, it is a global community. Virtual networking opportunities with alumni have been created for you, because the importance of connecting has become more apparent now than ever before. Networking with alumni allows you to collect crucial advice for your career path, and also to make connections with companies that will lead you to your first professional steps. It allows you to receive reassurance and input about the choices you are considering and clarity about your path.

We have two important alumni organizations waiting to connect with you: JUFA, based in the USA, and the alumni association, based in Germany. Both organizations have a virtual offering to help you get connected. Take advantage of all the online opportunities at your disposal! Attend all the sessions available, meet as many alumni as you can, hear their stories, and ask questions. Our alumni are known for being pioneers for a reason. Make sure you continue to live this legacy with us. You embody the core values of this University, and companies, NGOs, and research institutions are very much looking forward to meeting you.

The world has started turning faster again, and the economy needs new talent now to keep up with the demands of the future. Be engaged, get involved, and stay connected. I wish you a productive Career Fair and all the best on starting your professional journey!

---

We are the worldwide networking community of university alumni. Join us at our booth at the Constructor Career Fair and at: <https://portal.jacobs-alumni.de>

[www.jacobs-alumni.de](http://www.jacobs-alumni.de)

Studying at Constructor University gives personal contacts and professional connections, often for the whole life. The alumni association was founded by the first graduating class in 2004 with the aim to foster relationships between students after graduation, to create and nurture a lifelong bond between the university and its graduates, as well as to support current and future generations of students.

All members of the alumni association have the opportunity to share contacts, stories and expertise with other individuals who consider the university a lifelong home. An online account for keeping in touch with all graduates and classmates, yearly Homecoming and Class Reunions on campus, a growing number of local chapters in more and more cities around Europe and worldwide, and many other opportunities to get involved and to benefit from exclusive services: all this gives rise to the broad, multicultural, international networking community of alumni.
