Prof. Thomas Auf der Heyde, PhD
Managing Director and
Vice President of International
Outreach, Constructor University

Dear students, dear exhibitors, alumni,

Between remote work and artificial intelligence, digital opportunities are at the forefront of what shapes careers today. It is timely and appropriate, therefore, that this year's Constructor Career Fair is taking place in an online setting. As we give space to the changes in how work is done, however, many of the crucial questions in career development remain the same. Today, just like yesterday and like tomorrow, the central questions for young minds embarking on their careers are: What are my talents and passions? What do I have to contribute to the world? What changes do I want to create? What do I seek for me?

At the Constructor Career Fair, we take pride in creating connections between bright students pondering these questions, and excellent employers in need of their unique capabilities. In making these connections, we create a space for possibilities: the possibility to learn and grow, to expand horizons and to match challenging and rewarding jobs with the people perfectly qualified to perform them. I can confidently say: Every connection made at Constructor Career Fair is a success story. Whether your success takes the shape of an insightful conversation, an internship secured, or a new colleague found or recruited – may you leave today satisfied with the progress you've made!

Esteemed students, alumni, and employers, I wish you all a fruitful exchange. I would also like to extend my appreciation to our Career Services and Alumni Office for making this day a success.

Kind regards and best of luck!

Prof. Thomas Auf der Heyde, PhD
Managing Director and Vice President of International
Outreach, Constructor University

Eduard Dubbers-Albrecht
President of the Bremen Chamber
of Commerce – CCI for Bremen and
Bremerhaven

The economy is currently operating in an increasingly dynamic environment. Several crises have been putting additional transformation stress on politics, the economy, and society. Successfully mastering this transition period requires companies to act agile, to facilitate innovation, and to integrate new perspectives at the core of corporate performance.

During their transformation efforts, companies can count on an excellent, growing network of science and research facilities here in Bremen. Above all, they benefit from the large pool of well-educated graduates of the different universities in the state of Bremen. Leveraging this potential by ensuring a knowledge transfer from universities into to the economy is among the key success factors for individual companies as well as for the economy in general.

The "Constructor Career Fair" has partnered with renowned enterprises, startups, and local companies. This year's online event provides a low-threshold exchange platform to match companies with well-qualified international and local talents. Students have the chance to connect with potential employers regarding entry and career options. This exchange can be a kick-start for career development and recruitment alike.

The "Constructor Career Fair" provides a great opportunity to both young academics and corporate representatives in Bremen and beyond. Building bridges between science and business is not only crucial in terms of personal development but also for the innovativeness of companies. In light of this, I hope that all the participants at this online event will have interesting discussions and will establish new, valuable relationships.

Eduard Dubbers-Albrecht

Dr. Cornelia Scheitz
Alumni Association President

Dear students and alumni,

Since the hottest job market for employees in 2021-2022, we are now in the toughest job market. Competition for entry level jobs is at an all-time high. Employability and access to opportunities are key concerns for recent graduates. Despite the obstacles presented by social distancing, graduates of Constructor University have adapted and learned valuable lessons about navigating the professional world. And by being part of the Constructor community, we've transformed into a global network that thrives on connection.

Constructor offers more than just education; it fosters a supportive community. An education ecosystem. Virtual networking events with alumni have been organized to facilitate connections and provide valuable career advice. Engaging with alumni not only offers guidance for your career path but also opens doors to potential job opportunities and insights into various industries.

We have two prominent alumni organizations, the Alumni Association supporting globally and CUFA focusing on the USA, eager to connect with you virtually. Take advantage of these online opportunities to expand your network, attend sessions, and learn from the experiences of fellow alumni. Embrace the spirit of innovation and exploration that defines our community.

The world is evolving rapidly, and companies are seeking new talent to meet future demands. Stay engaged, be proactive, and remain connected to the Constructor network. I encourage you to participate in the upcoming Career Fair and embark on your professional journey with confidence.

Best wishes for a successful event and a rewarding career ahead!

We are the worldwide networking community of university alumni. Join us at our booth at the Constructor Career Fair and at: <https://portal.jacobs-alumni.de>

Studying at Constructor University gives personal contacts and professional connections, often for the whole life. The alumni association was founded by the first graduating class in 2004 with the aim to foster relationships between students after graduation, to create and nurture a lifelong bond between the university and its graduates, as well as to support current and future generations of students.

All members of the alumni association have the opportunity to share contacts, stories and expertise with other individuals who consider the university a lifelong home. An online account for keeping in touch with all graduates and classmates, yearly Homecoming and Class Reunions on campus, a growing number of local chapters in more and more cities around Europe and worldwide, and many other opportunities to get involved and to benefit from exclusive services: all this gives rise to the broad, multicultural, international networking community of alumni.
